https://russelpineda.com/

Full-stack developer who builds and runs the complete technical operation for service-based businesses, covering WordPress architecture, security, CRM automation, and brand design.

Relevant Experience

KINGDOMES LEISURE PTY LTD Remote/Australia
Lead Full-Stack Developer October 2025 – Present

- Conceives, architects, and deploys Glamporise (glamporise.com) on WordPress Multisite infrastructure, achieving a 94 Google PageSpeed Performance score
- Designs custom landing pages in WordPress/Elementor integrated with GoHighLevel forms, using GHL as a centralized CRM for lead capture
- Architects multi-stage GHL checkout funnels with Stripe payment integration and upsell logic for structured service tiers
- Designs email campaign creative in Adobe Photoshop deployed via GoHighLevel, while maintaining sending infrastructure (Mailgun, SPF/DKIM/DMARC) for deliverability
- Designs brand identity and content assets for Glamporise, including original logo concepts and 50+ pages of client-facing guides and ebooks

LA ROSE NOIRE PHILIPPINES Clark Freeport, Pampanga
Associate Software Engineer June 2025 – August 2025

- Develops and maintains web applications using PHP, JavaScript, and Python to support internal operations and enhance workflow efficiency
- Builds responsive, user-focused interfaces using HTML, CSS, and JavaScript, with early implementations of React, Vue, and Tailwind CSS
- Manages MySQL and MSSQL databases and ensures code quality through debugging, optimization, and version control with Git and GitHub

CLOUDSTAFF GLOBAL WORKPLACE INC. Angeles City, Pampanga
Associate Software Engineer Trainee February 2025 – May 2025

- Develops and maintains web applications, including the Floors Product, using CakePHP to improve functionality and performance
- Collaborates with developers within an Agile sprint framework, using Jira for task tracking and bug management to resolve technical issues within sprint timelines

Selected Projects

Glamporise Council Roadmap

Designs, builds, and deploys a complete customer acquisition system for Glamporise spanning a primary landing page and four stage-specific funnel pages, integrating GoHighLevel membership infrastructure, email marketing, and workflow automation end-to-end — converting an immediate Stage 2 membership sale post-launch.

Kingdomes Dome Configurator

Builds a standalone HTML/JavaScript application featuring procedurally generated SVG dome previews, a carousel state machine with selection-hierarchy logic, and real-time pricing across 5 dome sizes, integrated with GoHighLevel via webhook for direct lead capture.
